Model Making Magic with a

Tank & Diorama Workshop Experience

The Tank & Diorama Model Making workshop by F-4DableModels was a resounding success! Held at Level 1, The School, participants immersed themselves in the art of model building. They learned essential skills like cutting parts from sprues, assembling their models using plastic cement and putty, and adding vibrant colors to bring their creations to life.

With an interactive session that covered all materials, including a complete model kit, attendees left with impressive masterpieces and newfound skills. Thank you to everyone who joined us for this creative experience—we loved seeing all the fantastic models!
